

Agera®

Patent #US 11,002,676 B2

for...

CEILING TILES

HunterLab

Designed to measure ceiling tiles, Agera® measures color and UV content with an extra-large sample port and includes a camera for on screen sample positioning and image capture. Agera® includes easy to navigate embedded EasyMatch® Essentials software, providing all the scales and indices important in the building industry including CIE L*a*b*, CIE LCh, Hunter L,a,b, and more.

With modern data communications and a capacitive high-resolution color touchscreen display, Agera® is the perfect solution for measuring ceiling tiles.

0°/45°-c circumferential geometry and the largest fixed-point area of view in the industry

Full spectrum LED illumination with UV control

Sample viewing and image capture

Embedded EasyMatch® Essentials software – no PC required

Smart user interface and data management

eye sees it

The Best Solution for Color Measurement of Ceiling Tiles

0°/45°-c circumferential geometry and the largest fixed-point area of view in the industry

The non-uniformity of ceiling tiles can make accurate and consistent color measurement a challenge. Agera® solves this with its circumferential 0°/45°-c geometry and an extra-large 2" sample viewing area.

Full spectrum, balanced LED illumination with UV control

Illuminating from 360-700nm, Agera® allows you to measure and quantify fluorescent and optically brightened ceiling tiles with the ability to compare UV Included and UV excluded results simultaneously.

Sample viewing and image capture

Agera® includes built-in 5-megapixel camera to view live on-screen images for precise sample placement and allows the image to be captured and stored as part of the data file.

Embedded EasyMatch® Essentials software

The onboard EasyMatch® Essentials software is intuitive and easy to navigate. It offers applications to streamline production, allowing users to create their own workspaces to meet their specific application workflow needs. EasyMatch® Essentials comes preloaded with most standard reflectance scales and indices widely used in industry.

Smart user interface and data management - no PC required

View measurement results and color graphics on the 7-inch 1280x800 capacitive industrial touchscreen, and easily communicate data where it needs to go via USB, USB on-the-go, Ethernet, and built-in email.

Keys for the successful measurement of Ceiling Tiles

Agera® includes everything needed to be successful measuring ceiling tiles in a port-up configuration.

For port-forward sample measurements, the optional Sample Clamp should be ordered:
